Conformal-Map HSM Training-Time Benchmark

T	D	N	Training time (minutes)
2,000	200	8	5.44
2,000	400	8	8.43
2,000	200	16	14.36
2,000	400	16	23.06
4,000	200	8	7.18
4,000	400	8	10.89
4,000	200	16	15.67
4,000	400	16	24.73

Summary

All eight configurations completed successfully. Training times ranged from 5.44 to 24.73 minutes; the original (T, D, N) = (2,000, 200, 8) configuration took 5.44 minutes. These are single-run wall-clock measurements excluding dataset generation and final diagnostics.

Training parameters

- T = 2,000 or 4,000
- D = 200 or 400
- N = 8 or 16
- Epochs: 100,000
- Minibatch size: 100

Hardware specifications

- Apple MacBook Air, model Mac16,12
- Apple M4 processor
- 10 CPU cores (4 performance, 6 efficiency)
- 24 GB unified memory
